DENTAL NURSING AUSTRALIA | KINGSTON TRAINING & EMPLOYMENT

Infection Control Courses

Dental Nursing Australia provide a variety of delivery methods in which you can access infection control training, depending on the need and level of training you wish to achieve for the individual and the Dental Practice.

1. Infection Control Workshop for the Practice at the Practice.

Length of workshop: Half day – 3 hour session

Half day seminar includes: a power point presentation, Customized training, Certificates of Attendance (Clinical points) for those who participate, Practical activities.

Auxiliary staff, Management and Principles of the practice are welcome to attend.

Information in the half day workshop includes:

- Microbiology
- Infection Control Methodology
- Sterilization Techniques
- National Standards
- Universal Standards
- Policy and Procedures
- Work Health and Safety
- Decontamination Procedures
- Handwashing Protocol
- Chemicals Utilized

The sessions can be customized to your practice needs

Advantages of a half day workshop for your Dental Team:

- Gain valuable knowledge on the new National Infection Control Standards
- Empower your staff to implement these standards
- How to find out further information regarding infection control
- Suggestions incorporating the standards into the day to day workings of the practice as a team.
- Practical demonstrations on handwashing techniques, decontamination of the surgery, tracking and any other practical areas the practice requires.
- Assist in creating a learning and creative culture in the Staff regarding infection control.
- Assist in developing new policies and procedures to motivate all to work towards excellence in this area.
- Enhance work ethic and pride in their practice
- Programme can be customized to the practice needs

Cost: \$220.00 per person, \$165.00 over 6 participants, \$120 for over 12 participants
Prices include: GST

2. Individual Staff Development

Staff who feel they would like to attain Nationally Recognized Units in the area of Infection Control / Sterilization can enrol in specific units in the National Health Training Package HLT15. HLT45015 Certificate IV in Dental Assisting.

Objectives include:

- Microbiology
- Infection Control Methodology
- Sterilization Techniques / Tracking
- National Standards
- Policy and Procedures
- Work Health and Safety
- Decontamination Procedures
- Handwashing Protocol
- Chemicals Utilized

This is a correspondence module which requires the participant to complete written assessments and /or assignments and be assessed at the workplace or our training college.

Information and exercises are sent out to the Student to provide creative learning and self assessment material. Online information will also be available through 2019. When the Student feels competent, they can sit the written assessment paper.

Cost \$350.00 per unit, Pricing includes GST

\$95.00 Enrolment fee

Units can include:

HLTINF003	Implement and monitor infection prevention and control policies and procedures
HLTINF002	Process reusable medical devices and equipment
HLTWHS003	Maintain work health and safety
HLTINF001	Comply with infection prevention and control policies and procedures

HLTINF001	Core	<p>Comply with infection prevention and control policies and procedures</p> <p><i>This unit describes the skills and knowledge required to follow organisational infection prevention and control procedures, including implementing standard and transmission-based precautions and responding to infection risks.</i></p>
HLTINF002	Core	<p>Process reusable medical devices and equipment</p> <p><i>This unit describes the skills and knowledge required to clean, sterilise and package reusable medical devices and equipment.</i></p> <p><i>This unit applies to workers in office based health practice settings such as general practitioner (GP) surgeries, dental practices and other environments where a limited range of sterilisation equipment may be available. They follow established procedures and work under general supervision.</i></p>
HLTINF003	Core	<p>Implement and monitor infection prevention and control policies and procedures</p> <p><i>This unit describes the skills and knowledge required to provide information about infection prevention and control procedures, integrate those procedures into work practices and monitor workplace performance.</i></p> <p><i>This unit applies to individuals working in health or direct client care contexts, who have a coordination, team leading or supervisory responsibility in relation to infection prevention and control.</i></p>
HLTWHS003	Core	<p>Maintain work health and safety</p> <p><i>This unit describes the skills and knowledge required to implement and monitor work health and safety (WHS) policies, procedures and work practices as part of a small work team.</i></p> <p><i>This unit applies to workers who have a key role in maintaining WHS in an organisation, including duty of care for other workers.</i></p>

The units above form part of the HLT45015 Certificate IV in Dental Assisting 10 core and 4 electives.

3. Further customized training or workshops at DNA

Motivated practices who feel they would like to develop an on going staff development programme or extend the sessions of training, can establish customized short courses for their staff in specific streams of Infection Control or other training areas of need. These can be developed for your individual practices requirements.

These are charged on individual requirements and length of training. They can be delivered at our training centre at 63 Abernethy Road, Belmont or at the Dental Practice.

Lecturing Staff

All Staff have a minimum of 5 years experience in Dental Assisting or Dental Nursing with a Qualification recognised in W.A. and a Certificate IV in Training and Assessing. Lecturers in this area delivering the training are in constant communication with Government and Private professionals in the Infection Control area and attend courses in infection control to complement the Australian Dental Association policies.
